

S5 CORE ALIGNMENT ALL IN ONE FUSION SPLICER

A Splice machine that has everything you need on the chassis. You will never forget anything!

It covers the 5 x steps in splicing a pigtail / cable with the unique features of "all in one"

1. **STRIPPING:** thermal stripper removes jacket to expose bare fiber. No manual stripping required.
2. **CLEANING:** isopropanol pump bottle on the chassis that you can refill daily.
3. **CLEAVING:** cleaver on chassis allows for stable cleave with auto roll-in for fiber chips to comply with OHS rules
4. **SPLICING:** the splicer is core alignment which makes it very accurate with on average 0.01dB loss over the splice
5. **SLEEVING:** oven is a dual heater and can handle many sizes of splice protectors. Cooling tray included.

K11 3-AXIS OPTICAL FIBER FUSION SPLICER / CORE ALIGNMENT

K11

Includes:

- Hard Carry case
- Cooling tray
- Battery charger
- Spare electrodes

- Universal holder applied: 250um ~ 3mm, in-door cable
- Fastest splicing time: 6sec, Fastest sleeving time : 9 Sec
- Resistant to drop test from 76cm, waterproof IPx2 , Dustproof IP5x
- Powerful lithium polymer battery with large capacity
- Optical fiber recognition capability and LED lamp in heater
- 5.0-inch colour LCD monitor with touch screen & bidirectional operation system
